

Dear Friends,

Another year of full activities at the Institute.

Another year to come and ask for your support.

Let's start with our work first.

We have continued – with success – some of our old activities but added some new work too.

A NEW BOOK

After several years of work you will now find published our book “Childhood Illnesses and Immunizations”. Judging by first responses, we can be proud of this effort.

The intent of this book is rather far ranging. It is, first of all, a comprehensive exposition of the concerns named in the title from an anthroposophical viewpoint. As a “bonus” one will find all the Rudolf Steiner passages that we could find relating to the topic. At any rate we believe it is the most comprehensive collection of such quotes available. (If you find any that are not listed we would appreciate you letting us know and we will gratefully include it in the next edition ☺) We offer a lot of practical advice in the book on dealing with both situations: when giving immunizations and when avoiding them. Actually, when taken to heart, the book is also a primer on the practice of anthroposophic medicine.

The most important aspect, however, is that we point out in a very comprehensive, and hopefully persuasive, manner the importance of a spiritually oriented (ideally Waldorf)

1005 Richards Rd., Suite D, Hartland, WI, 53029, 262-912-0970, www.koliskoinstitute.org

education which should be given to any child in order to overcome the negative influence of the immunizations. (Keep in mind that under the current culture and laws, sooner or later most children and young adults will be immunized!)

Please let your friends know about this publication.

To purchase a copy of the book, click [here](#)

Note: profits from the sale of this book go in their entirety to benefit the research at the LKI.

The Kolisko Validation Research

As most of you know, for many years we have conducted research to demonstrate the effect of potentized substances on the life forces in wheat seeds. We have been able to show, in study after study that even in ultra- high dilutions where there is not a single molecule of the actual physical substance left, there is a demonstrable, statistically significant effect evident. Moreover, we have seen again and again that anthroposophically prepared formulas are more enlivening on the growth forces (the etheric forces) than the usual commercially prepared products. Here you see one example of our work. As you know, ginger is widely recommended as an anti-inflammatory substance. As such, one would expect it not to stimulate but rather to inhibit the growth of the seeds, to inhibit the “life forces”. You see below a graph demonstrating that our ginger formula is stronger at inhibiting these growth forces than a comparable commercially available product. (Results hopefully to be published soon.)

Wouldn't it be great if more of these experiments could be done to show increasingly the superiority of anthroposophical remedies and to establish anthroposophical research as a credible effort??

Educational Endeavors

We are continuing our efforts in multiple directions.

One of us (Andrea Rentea MD) is mentoring several colleagues in increasing their proficiency in anthroposophical medicine.

Recently we have finished a very successful three- day conference on the Foundation Stone and its Rhythms, a conference-workshop with lectures, eurythmy and art displays; eurythmy, speech and violin performances in the evening; and lots of discussion groups with productive deepening of the topic. All the participants – who came from all corners of the U.S.- were impressed by the originality of the ideas and the welcoming camaraderie, All left with strong, positive impulses for the future. As you can see in the photo at the end of this letter, we were rewarded at the end with a powerful rainbow.

Thank you to all who helped to make this a success!

Incidentally, the success of the conference gives us the courage to try sharing this event through webinars in December. We will announce them soon.

A Crisis Situation

Dear Friends, unfortunately the financial situation is getting worse.

That we are able to continue operating at all is due to the fact that we have made drastic cuts in our overhead –for example no salary at all for the principals at both related institutions (True Botanica and the Institute) as well as thanks to the generous donations that have come in the past year from you, our friends. Thank you again!! But we need your help one more time.

How can you support? Here are some suggestions – and we are open to more ways:

- Make a generous, tax- deductible donation, to the Institute.
The most important gesture would be for everybody who reads this appeal to send in a minimum \$1 contribution! It would be important for us to show a high level of participation.
For those who can, may we suggest as a guide the donation of one day of your income. (Maybe some could do even more?!)
To all who can contribute at the level of \$300 or above we would like to express our appreciation through sending you a free copy of our recent book.
- Increase your purchase of the TB products. If everybody who reads this appeal would buy, on a more regular basis, the TB salt, pepper, coffee, hand and body cream, multivitamin and minerals, the new supplement for winter health, and more, we would be greatly helped at the Institute.
- Of course a great help would also be simply purchasing our new book, letting your friends know about the TB products or maybe steering your place of work to make a matching contribution towards our non-profit Institute.

Thank You All

Ross Rentea MD, Mark Kamsler MD,
Andrea Rentea MD
